

SIMULIA Helps Keep Me Running

Simulation for the Real World

Drivers expect their car's engine to be efficient and reliable. Our customers use SIMULIA solutions to design engines that are quieter, more durable and use less fuel. We partner with our customers to develop advanced powertrain simulation technology which helps them get closer to real world behavior and build better engines for drivers and the environment.

SIMULIA is the Dassault Systèmes Brand for Realistic Simulation. We provide the Abaqus product suite for Unified Finite Element Analysis, Multiphysics solutions for insight into challenging engineering problems, and SIMULIA SLM for managing simulation data, processes, and intellectual property.
